# MMG INSIDE EDITION!

## Our Inaugural Edition!

### A Word From Dr. Moore:

Every year since 2000 a slow fire has been burning inside me, as it relates to the medical care of patients suffering with mental illness. At its core I have realized that a large part of the reason there is substandard care is the stigma associated with these patients. It is with great joy that I monitor Federal, state and local recommendations to do better, to integrate better systems between primary care and mental health. The fact still remains, that personal attitudes will continue to define the competent compassion that is needed in this evolving medical specialty. Moore Medical Group is based on one principle... Customer service. Yes, we are in essence medical professionals, but more importantly we treat our patients, unit techs, janitors and CEO's the same, with respect and the way we would like to be treated as human beings. When we take on this mindset we will continue to be an organization that is involved in changing the world around us. You may not realize it, but you are a part of a paradigm shift, a part of national change. It is my intention that Moore Medical Group leads the way.

<b>Mission Goal:</b>
<i>Decrease the mortality rate for Psychiatric patients in the United States</i>

## MOORE MEDICAL GROUP GOES NATIONAL!

As we began 2013 a very bold decision was made: It was time for National Expansion. The forum was chosen to introduce Moore Medical Group and the services offered. We attended and served as a sponsor for the National Association of Psychiatric Hospital Systems. Attendees were excited about our ability to integrate Psychiatric and Medical care in the behavioral hospital setting. We began forming relationships that have led to new partnerships in many states.
